

# Low Profile Web Guides

---

Most intelligent **WEB GUIDES** should be **EASY TO USE!**

## Key Features

---

- **Minimal height profile** – fits in tight vertical spaces
- **Complete integrated system** – sensor, controller, actuator, and frame included
- **Zero recalibration sensors** – material-agnostic detection works on any substrate
- **High-speed response** – fast actuator response for demanding applications
- **Easy maintenance access** – components accessible without major disassembly

## Benefits

---

- **Stop redesigning machine layouts** for bulky web guide systems
- **Eliminate vertical space constraints** – low profile design fits where others cannot
- **End sensor recalibration time** – material-agnostic sensing works on any substrate
- **Remove maintenance delays** – easy access design reduces service time
- **Prevent production compromises** – high-speed response handles demanding materials
